Background

REACH stands for Registration, Evaluation, Authorisation and Restriction of Chemicals. It was originally an EU regulation that came into force on 1st June 2007, with the central aim of protecting human health and the environment from risks arising from hazardous substances, mixtures, and articles.

Since 1st January 2021, following the UK's departure from the EU, REACH has split into separate UK REACH and EU REACH regulations.

REACH places legal obligations on manufacturers and importers of chemicals and finished products (including packaging) to ensure the substances used are safe for their intended use.

Certain chemicals are classified as Substances of Very High Concern (SVHC) and are published on the:

- EU Candidate List: <https://echa.europa.eu/candidate-list-table>
- UK Authorisation List (Annex XIV): <https://www.hse.gov.uk/reach/authorisation-list.htm>

These lists are updated regularly, and compliance requires ongoing monitoring.

Declaration

As of 23rd September 2025, I hereby declare that all products supplied by Mainline Mouldings comply with the applicable REACH obligations.

I confirm that:

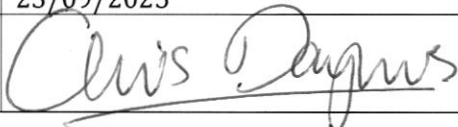

- No SVHCs are present within the supplied articles in concentrations above 0.1% w/w (1000 ppm).
- There have been no material composition changes since the testing report CTB200226001CX.
